

Structor Multi Pivot Hinges are primarily designed for use in bulwark doors on board of luxury yachts. The hinges are concealed when the door is closed. When the door opens 180° the hinge arms move in the same plane leaving a very aesthetic impression.

The hinges mount in aluminium or stainless weldable pockets or in composite pockets that can be laminated in the surrounding structure.

Please consult Structor for applications other than bulwark doors. On request we can design hinges for other applications and loads.

Please consult us for CAD drawings, 3D models or alternative applications.
